

Allegedly pushed: "attack on democracy"! they cried out ...

Peace maybe more dangerous than war

- Primeminister Mette Frederiksen, 17 december 2024

(Warning to those who might read this article: I'm far from fluent in english
🤪🤪)

Just six months prior to this statement made by danish Primeminister Mette Frederiksen, she was allegedly pushed by an alleged drunk polish man high on drugs, in the town centre of Copenhagen 🤪. What happened?? Well, you can search for yourself for example here:

So why was herself the [current] Primeminister of Denmark Mette Frederiksen suddenly *attacked* (for the first time in her political career) you might wonder?? And why so close to the EU-Parliamentary election? And again: why just two days after I publiced the crucial document:

??

And yet again: why did they all cry out in a mantra-chorus (Denmark and Europe): "attack on democracy" and other wildly exaggerated pronouncements?? Why did they blame the *average* danish citizen (as they always do)?? Well, I've explained my thoughts on that extreme **setup** [#FalseFlag](#) in an analyzing article (with a humourous touch 😊) publiced here on **X : Setup-Seancen Det Falske Flag** and on my homepage Forlaget Nemesis

Det Falske Flag af 27 januar 2025

<https://www.forlagetnemesis.com/wp-content/uploads/2025/01/Det-Falske-Flag-af-27-januar-2025-opdateret.pdf>

based on danish state-media [with a little help from Ritzau and AI] articles from June 7 to around August 8, 2024.

The alleged *attack* Mette Frederiksen allegedly suffered from, made her allegedly very vulnerable in the following days they wrote. Her voice was close to break in a speech at the event *Folkemødet*, Bornholm a few days later. It *hit* her especially mentally/psychologically. And the experience might change her forever, she said (the old Mette vs. the new Mette). She also said, that it was very intimidating - beyond normal limits - to be attacked in this insulting way. Her college Trine Bramsen (former minister of defence) pronounced:

In Denmark we use words not violence. Period! (June 7, 2024)

So the very same *crying-out-lout-people*, European members of the world wide Simultaneous-Chorus (a new phenomenon in this [#WEF](#) era) that estimate a push (allegedly with a fist..."out of the blue"...) as a horrific violent act and a deeply insult - but also as an "attack on democracy" (because it involved a Primeminister), have absolutely no second thoughts in pushing the world closer to World War 3. Instead of dialogue and diplomacy, they want to prolonge the war in Ukraine. Despite all the death and destruction already occurred.

Primeminister Mette Frederiksen is beyond disgusting, dangerous and mentally off - and so are all those who participates both in the setup (2024) and now in these crucial wartimes - in my opinion (exactly how many knew it was a false flag event June 7 2024??) She should be impeached before the court of high crimes and misdemeanours (danish Rigsret) on the crimes committed **2017 - 2025**
